Aeternum, Inc. Announces OEM Agreement with Pentaho Corporation

Integrates Pentaho Business Intelligence in its Athiva Development Platform to Provide Users with Comprehensive Analytics and Data Mining

Westford, MA, April 2, 2009 - Aeternum, Inc. (www.aeternum.com), a provider of software development services and solutions, today announced an OEM agreement with Pentaho Corporation, the commercial open source alternative for business intelligence. Aeternum will integrate Pentaho's BI Suite Enterprise Edition into its Athiva application development platform to provide users with comprehensive analytics and data mining capabilities while accelerating their time to market and lowering their total cost of ownership. The announcement was made at Pentaho's [Partner Summit 09, BI Acceleration](#), taking place in Menlo Park, California this week.

Athiva is an enterprise-level application development platform that leverages ready-to-use and highly customizable business application services commonly used in enterprise software products. By eliminating the need to develop common business services and applications from scratch, or to integrate disparate business services to form a common interoperable services layer, Athiva can shorten the development lifecycle of any enterprise application or product by over 50%. Aeternum targets Athiva at early-stage software product companies and internal IT organizations that depend on efficient development processes to operate their businesses and compete effectively.

"Business intelligence is a core component of most packaged and custom-built enterprise applications," said Lars Nordwall, senior vice president of business development at Pentaho. "By incorporating Pentaho's robust business intelligence and data mining capabilities into its Athiva platform, Aeternum is providing users with best in class BI capabilities while increasing their flexibility and lowering their total cost of ownership."

“Many IT organizations expend valuable time and capital developing and integrating business intelligence capabilities,” said Rajat Bhakhri, president and CEO at Aeturnum. “By integrating Pentaho’s rich data mining functionality into our Athiva development platform, we’re helping users accelerate their time to market, reduce their development costs and focus their efforts on their organization’s core intellectual property and unique differentiation.”

Aeturnum also provides value-added consulting and integration services for the Pentaho Enterprise BI Suite for the finance, banking, retail, technology, telecommunications and utility industries. It was recently nominated as Systems Integrator Partner of the Year by Pentaho along with Accenture and Saama Technologies.

About Pentaho

Pentaho Corporation is the commercial open source alternative for Business Intelligence (BI). Pentaho BI Suite Enterprise Edition provides [comprehensive reporting](#), OLAP [analysis](#), [dashboards](#), [data integration / ETL](#), [data mining](#) and a [BI platform](#) that have made it the world's leading and most widely deployed open source BI suite. Pentaho's commercial open source business model eliminates software license fees, providing support, services, and product enhancements via an annual subscription. In the years since Pentaho's inception as the pioneer in commercial open source BI, Pentaho's products have been downloaded more than three million times, with production deployments at companies ranging from small organizations to The Global 2000.
